Refacée® Treatment Disclosure Statement

The Refacée® procedure was developed by Dr. Susan Schehr in 1997 after she noticed that a reduction in tension of her patients' facial muscles seemed to diminish facial wrinkles and facial lines. Although Dr. Schehr has used the Refacée® procedure for over 15 years and frequently noticed positive results in patients, there is no guarantee that the Refacée® procedure will produce any particular results for any particular patient. Results of the Refacée® procedure may vary and Dr. Schehr makes no guarantees or warranties regarding any specific results of the Refacée® procedure.

There are no published studies addressing the Refacée® procedure or indication that the techniques of the Refacée® procedure with produce any particular results. However, several medical studies and publications have indicated that the relaxation of facial muscles may result in an improved appearance, including a reduction of facial lines and wrinkles.

Dr. Schehr is available to answer any questions you may have regarding the Refacée® procedure.
